

## **CASTIGLIA ASSOCIATI**

The Castiglia Associati design partnership was founded in 1982 by Sergio Castiglia, Marinella Santarelli and Maria Tiziana Tazza. Since then, it has mainly worked in design for the furniture industry, paying painstaking attention to the products evolution and industrialisation. Over its years of operation, it has successfully designed many products that have won commendations or awards at exhibitions and fairs in various sectors: Kitchens (Binova, Arc Linea and now Ernestomeda); Ornaments (Potocco, academia and Segis); Bathrooms (Merati, Albatros and now Rifra) Living Rooms (Feg) and Accessories (Colombo Design and Confalonieri). During the last few years, Castiglia Associati's working method has evolved in line with the innovations in graphics made possible by the development of computer technology, and the need to provide a total interpretation of the project's culture, from its conception to its communication.
